

Minera IRL Limited - Corihuarmi Gold Mine Production March Quarter, 2010

London, 4 May 2010: Minera IRL Limited (“Minera IRL” or the “Company”), (TSX:IRL) (AIM:MIRL) (BVL:MIRL) the Latin American focused gold mining, development and exploration company, announces the March 2010 quarter production results from its Corihuarmi Gold Mine.

Highlights:

- **Gold production of 7,071 ounces, above budget**
- **Quarterly cash operating costs of \$432 per ounce in line with expectations**
- **Gold sales prices for the quarter averaged \$1,110 per ounce**

Corihuarmi production results are summarized in the table below:

	<i>March Quarter 2010</i>	<i>March Quarter 2009</i>
Ore mined and stacked on heap - tonnes	371,963	275,403
Ore grade, mined and stacked - g/t Au	1.02	1.04
Production - Gold, ounces	7,071	7,150
Shipments - Gold, fine ounces	7,541	7,389
Sale price received - Gold, US\$/ounce	1,110	906
Cash operating cost - US\$/ounce	432	364

Mining and treatment continued on schedule with most of the ore sourced from the Susan Pit. Grade and gold production were consistent with the first quarter of 2009. Cash operating costs increased mostly as a result of an increase in mining and treatment tonnage of 35% but were still below budget.

Minera IRL Limited Executive Chairman, Courtney Chamberlain, comments “Corihuarmi continues to perform very well. Whilst cash cost per ounce has increased due to the higher tonnage, the strong gold price from our spot sales has more than offset the higher cost compared to the first quarter of 2009.”

Production and cost statistics from Corihuarmi have been internally generated by Minera IRL and are unaudited.
